ISDI was created in 2008, jointly by the Academy of Sciences of Moldova (ASM) and the Ministry of Information Technology and Communications (MITC)

Vision

ISDI aims to become a reference institute in the country’s RDI system, which promotes the use of information society technologies in key areas for the society development.
Information Society Development Institute

Research profile

Scientific support and tools for information society development

Our activities focus on the research, implementation of projects and information systems for creation, dissemination and use of digital content, in order to increase and enhance the scientific and technological potential of the Republic of Moldova.

Research priorities

- Applied and prospective ("foresight") research on information society development
- Projects and applications of decision-support systems and S&T collaborative networks
ISDI capacities and activities

Focus areas
- Information society policies
- Models and tools for information society development
- Information security
- e-Government
- Open Acces. Open data, big data and data mining
- R&D Management
- eInfrastructure
- Web Applications

International S&T cooperation
- ISDI researchers are experts in ERAWATCH, members of the FP7 ICT Committee, Euroscience etc
- ISDI hosts the FP7 ICT National Contact Point
- Joint projects performed with research institutions from the EU, the CIS and other countries
**R&D Projects**

**National**

- Deployment of information resources and development of network technologies for the support of scientific research
- Implementation of the information system for educational management at the University of the Academy of Sciences of Moldova
- EXPERT online – Moldovan S&T Proposal Submission and Evaluation System (www.expert.asm.md)
- Development of the National Bibliometric Instrument (www.ibn.idsi.md)
- Development of Decision-Support System for selection, financing and management of publicly funded R&D projects

**Bilateral**

Risks affecting the transition from the information society towards the knowledge society. Foresight research on Romania and Republic of Moldova
International Projects

• IVF DISCUS 2015 - Visegrad project

• FP7 project, IDEAL-IST 2014 - Trans-national cooperation among ICT NCPs, 2011-2014  www.ideal-ist.eu

• FP7 project, SEERA-EI South East European Area for eInfrastructures, 2009-2012  www.seera-ei.eu

• FP7 project, EXTEND Extending ICT research co-operation between the European Union, Eastern Europe and Southern Caucasus, 2009-2011  www.extend-ict.eu

• STCU project, Creation of unique information environment in GUAM community for remote training and technical and scientific cooperation, 2008-2009  www.e-design.idsi.md/en/about
Moldova Governance e-Transformation Project

Based on the Strategic Program for Governance Technological Modernisation in 2011 in Moldova was launched the governance e-Transformation project

ISDI tasks
- Igor Cojocaru - member of the Coordinators Council for e-Transformation (the main objective of the Council is coordination of e-Transformation processes in the public sector)
- Igor Cojocaru - member of the Interoperability Group
- Support the open data initiative, ASM published 9 datasets on http://data.gov.md
- Support the “Paperless government initiative” – 2014
ISDI achievements

- Design, development and operation of “ACADEMICA” e-Infrastructure for research and innovation, that interconnects all institutions of ASM
ISDI achievements

Development and maintenance of “EXPERT online” (www.expert.asm.md), national S&T Proposal Submission and Evaluation System, that acquires, analyses and categorises extremely large, rapidly evolving and incomplete amounts of information.
Development of information systems for management of national scientific publications – National Bibliometric Instrument

www.ibn.idsi.md
ISDI achievements

Development of systems for learning and learning applications for teachers and students (eLearning platform for University of ASM)
ISDI achievements

Development of websites for R&D promotion (33 websites of R&D organisations, publications, scientists, R&D events, R&D systems etc.)
