

TAP System

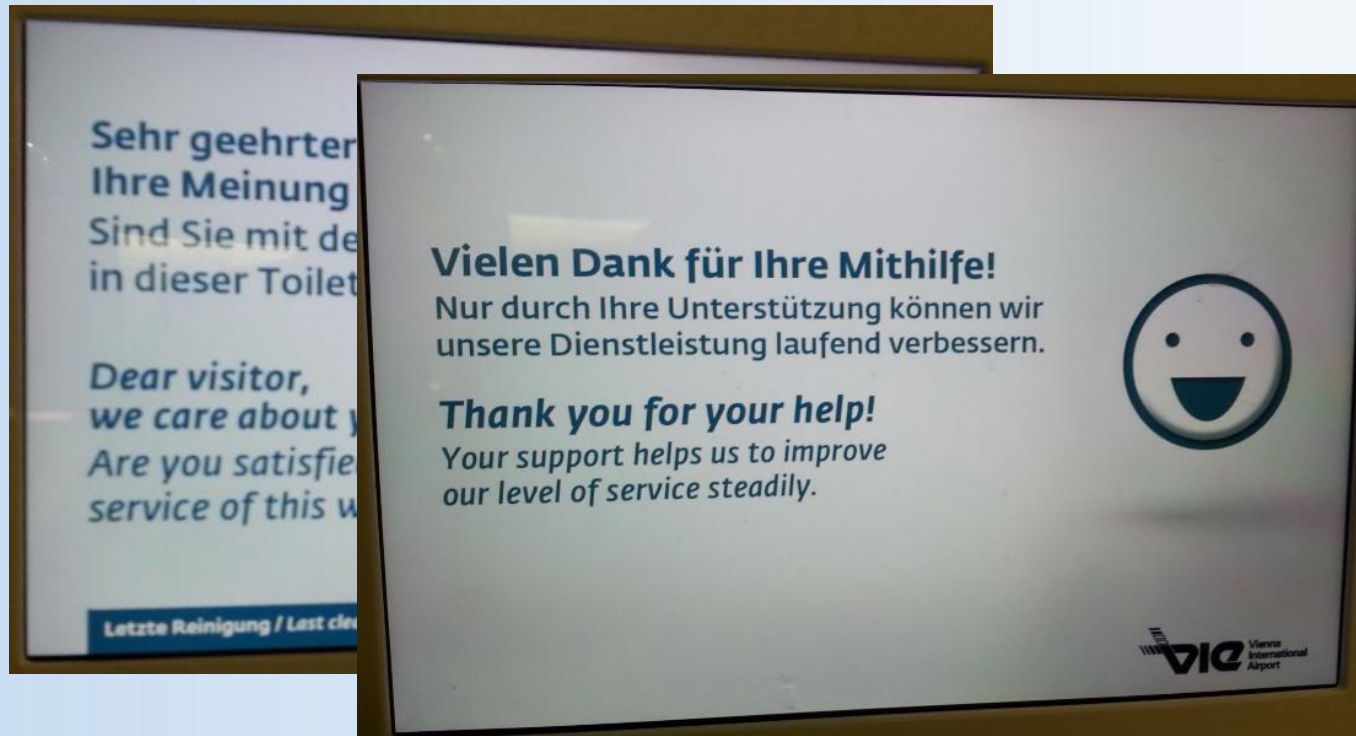

(example of outputs based on
feedback questionnaires of Study Visit
participants in SK)

Seminar No.2
24.-25.11.2015
Chisinau

Vladimír Benko, proIS, s.r.o.,
Banská Bystrica, Slovakia

- To receive outlook / feedback of people is important by all services (also by eServices)

How to do?

example of feedback questionnaires

Classical way

□ how we did it:

- MS Word form
- printing
- filling
- processing in MS Excel

Using TAP system

□ how we could do:

- form in TAP System (with bar code)
- printing
- filling
- scanning
- processing in TAP System

- **scope:** for testing of knowledges, evaluation of questionnaires / inquiries / surveys
- **usage:** in schools, by recruitment, by obtaining of feedbacks, by finding of outlooks or sentiment
- **how it works:**
 - preparation of questionnaire
 - printing of questionnaires
 - filling the questionnaire
 - assessment of all questionnaires

- benefits of TAP System:
 - more convenient work
 - quicker way to result (short time to reach results)

- 3 variants of graphical outputs in 3 formats (pdf, doc, xls)
 - it is possible to develop **various views on outputs**, e.g.:
 - to use only choosed questions
 - to join questions with the same answers to common table and graphs
 - to generate outputs to tables and graphs in one breath or singly
 - to develop outputs also with intermediate data to relevant question / questions

How to do? - **Outputs**

example of feedback questionnaires

Classical way

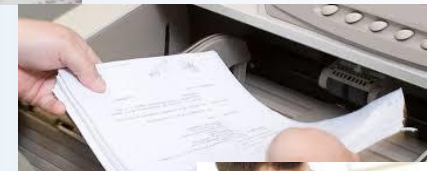

□ how we did it:

- MS Word form
- printing
- filling
- processing in MS Excel

Using TAP system

□ how we could do:

- form in TAP System (with bar code)
- printing
- filling
- scanning
- processing in TAP System

How to do? - **Outputs**

example of feedback questionnaires

- 3 variants of graphical outputs in 3 formats (pdf, doc, xls) – 1 2 3 4 5
 - View on open questions
 - Criteria view
 - Number of answers on questions
 - Table view on answers
 - ...
- ... all depends how to use the results further

Thank you for Your attention !!
